

A college education can help you reach your dreams!

You can make college happen by taking classes that challenge you and taking additional steps to reach your full potential. Of course it is best to start early, but it is never too late to start getting serious about getting ready for your future.

What Classes Do I Need to Take?

Different colleges have different expectations of the courses you should take and many admissions offices prefer students who have taken more than just the minimum requirements. The NH Scholars Program (www.nhscholars.org) suggests the following:

- **English:** 4 years of college preparatory English composition and literature.
- **Math:** 3 years (4 is recommended), including algebra I, geometry, algebra II, or higher mathematics.
- **History and Social Science:** 3 and 1/2 years, including 1 year of US history and 1 year of social studies.
- **Laboratory Science:** 3 years, including 1 biological science and 1 physical science.
- **Foreign Language:** 2 years of the same language.
- **Visual and Performing Arts:** 1 year of dance, drama, theater, music, or visual art.
- **College Prep Elective:** 1 additional year of any college prep subject.

Remember: you want to keep up a good overall grade point average (GPA) by working to your potential in every class.

You will have plenty of time to complete these classes if you start planning early. Don't worry if you feel you are behind—check with your school counselor and she/he can help you.

Grades and Classes Are Just Part of the Equation

Steps you can take outside the classroom at each grade level to get ready for college:

9th Grade

Students:

- Visit a school counselor in the guidance office to learn about resources for homework help, career exploration, and college planning.
- Work with your counselor to set up a four-year plan for your classes.
- Take challenging and fun courses that will satisfy USNH college/university admissions requirements.
- Do your best and don't put things off until the last minute. Make time for social stuff, but make time for school work as well.
- Look into extracurricular activities at school, as well as community service opportunities—You'll grow so much from the experience of getting involved. Plus, colleges like students who are active in and out of the classroom.

Families:

- Attend back-to-school nights and meet with school counselors and teachers to get information about the courses your student needs to take that best prepare her/him for college.
- Take your student to athletic and cultural events, or other activities at a local college to expose her/him to a campus environment.
- Start or continue saving for college. Even a few dollars a week will impress upon your student the importance of making a commitment to get a college education. Check out 529 savings plans. New Hampshire's plan, called UNIQUE, is managed by Fidelity Investments: www.fidelity.com/unique.
- Continue to stay involved in your student's homework and progress in school by checking her/his work daily.

What Skills Will Help Me to Succeed?

Reading, writing, math, and science form the foundation of your education. It is important to master the skills in these areas, as they will give you the tools you need to succeed in college and beyond.

- **Reading:** Reading—literature, fiction, and nonfiction—(and lots of it!) helps to improve vocabulary, verbal skills, and writing ability.
- **Writing:** Expressing yourself well is important in every field. Practice good research and writing techniques. Get feedback and give yourself plenty of time to rewrite and edit your assignments.
- **Making Calculations:** Having an understanding of math and science in today's technological world is a must. Progressing from basic math to algebra, geometry, calculus, and trigonometry will give you the tools to new ways of thinking and problem solving.

How Important Are Grades?

Your learning experience is the most important thing you can take away from high school. Grades indicate your mastery of core subjects and motivation to succeed. So better grades will provide you with more opportunities for education beyond high school. But your college application includes more than grades, and admissions offices will also consider your SAT or ACT scores if required, recommendations, and volunteer, extracurricular or leadership activities.

Another Path to a College Degree – New Hampshire's Community Colleges

As important as college is for personal and career development, not everyone is ready to jump from high school right into a traditional four-year program. Starting your college education at a community college and later transferring to a USNH college or university to complete your bachelor's degree is another option. New Hampshire's Community College System (www.ccsnh.edu) and USNH colleges/universities have agreements in place for easy transfer of credits. Visit www.NHTransfer.org for details.

USNH Admissions Offices

College admissions counselors are just that—counselors. They are available to answer your questions, even before you apply. Don't be afraid to contact an admissions counselor for advice on what you can do to better your chances of being accepted. Remember, they want you to succeed and are trained to help you get where you want to be. Be sure to check application deadlines at the University of New Hampshire, Plymouth State University, and Keene State College, as the dates may vary. Granite State College and the NH Community Colleges accept applications throughout the year.

for college

Tips for 9–12 Graders and Their Families

Brought to you by:

University System
of New Hampshire 

www.getreadynh.org

10th Grade

Students:

- Consider taking geometry or algebra II and college prep English—talk with your school counselor about your best course options.
- Begin thinking about the majors of study that most interest you. Visit the Center for College Planning at NHHEAF online at www.nhheaf.org for career exploration tips and tools.
- In October, take the PSAT, a practice exam for the SAT (www.collegeboard.com). You can use PSAT results to see where you are strong and where you may need to improve.
- Talk with your teachers and school counselor about taking an advanced placement (AP) or honors course as a junior.

Families:

- Arrange visits for your student to USNH college/university campuses or other nearby campuses.
- Seek opportunities for your student to job-shadow or interview professionals in careers she/he is interested in.
- Learn the basics about college costs and financial aid from the Center for College Planning at NHHEAF. Visit www.nhheaf.org or call a college counselor at 1-800-525-2577, extension 119.

12th Grade

Students:

There are many things to accomplish this year, but each step gets you closer to your goal of going to college.

- Review class schedules with your school counselor to ensure you are meeting college prep and graduation requirements.
- If offered, consider taking advanced math such as trigonometry or analytic geometry/calculus, English, an additional year of a foreign language, and other courses required for college admission.
- Spend a day with a parent at work or look into other job-shadowing opportunities.
- Think about your college application essay. Write a practice essay and ask your school counselor or teacher to make suggestions for improvement. For free proofreading, e-mail them to NHHEAF at collegeplanning@gsmr.org.
- Visit the colleges/universities you are interested in attending.
- Early September:** Register for the SAT, SAT II, or ACT. See your school counselor for details or register online at www.collegeboard.com.
- Request written teacher recommendations to use as part of your college applications.
- November:** Consider early admission. Review the college/university application process and be sure to check application deadlines.
- December:** Attend a financial aid night, if your high school has one, to gather more information about college costs and financial aid.
- January:** Work with your family to complete and submit the Free Application for Federal Student Aid (FAFSA). Check out www.fafsa.ed.gov for more information and an online application.
- February:** Ask your school counselor about local scholarship opportunities. Visit www.nhcf.org, www.nh93.com, and www.fastweb.com to get free scholarship information.

- May 1:** This is the when date all students must choose their college and reply to that college to confirm acceptance. Also in May, take advanced placement (AP) exams for any AP subjects you may have taken. Scoring well will give you college credit.

Families:

- Visit the campuses your student is interested in and meet with admissions representatives.
- Attend college information programs and talk with college representatives when they visit your student's high school.
- Check with high school counselors or career center directors for scholarship opportunities.
- Call the Center for College Planning at NHHEAF (1-800-525-2577, ext. 119) for help with any questions relating to the college process. Or make a FREE appointment with a college counselor for assistance.
- October 1 to November 30, very important:** Have your student apply to colleges/universities for the next fall during this initial application filing period. Be sure to find out the college or university's application deadline.
- January:** Complete the Free Application for Federal Student Aid (FAFSA). Submit it to www.fafsa.ed.gov.
- May:** Have your student take AP exams for any AP subjects she/he has taken.
- June:** Work with the financial aid office to determine your best college financing strategy.
- Summer:** Make sure your student takes part in summer orientation programs for freshmen.

11th Grade

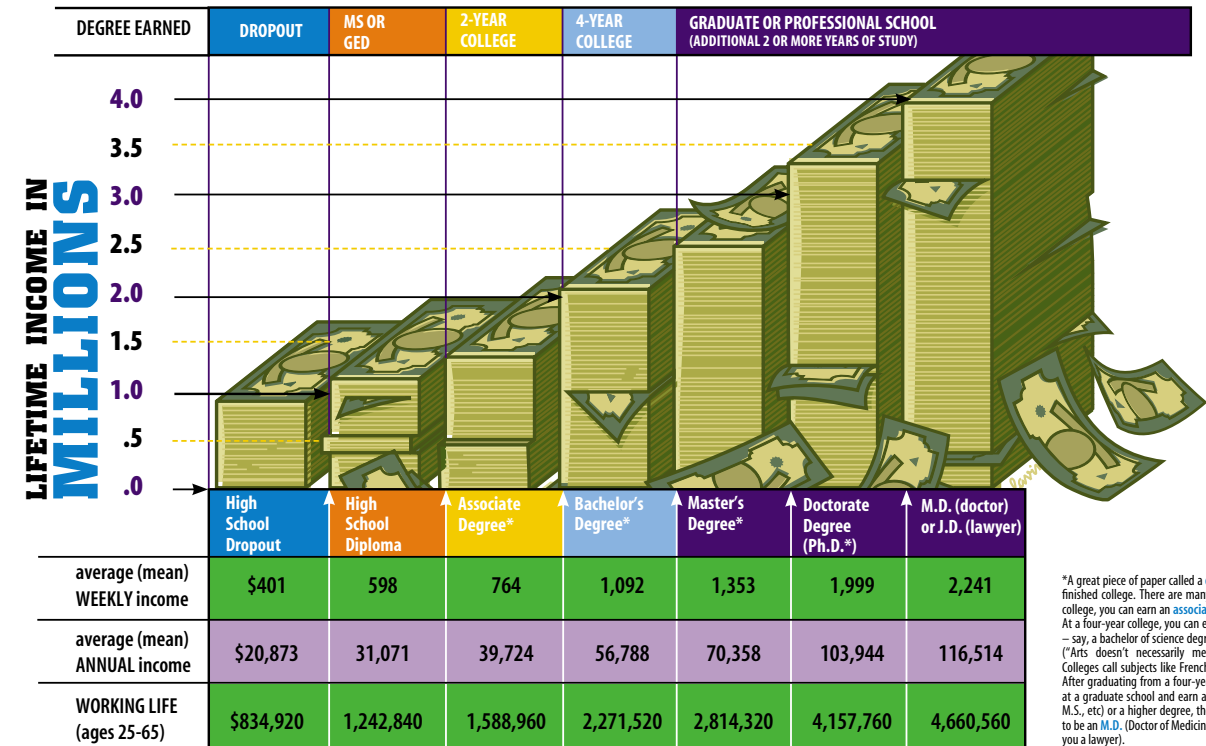

Students:

- Check with your school counselor to make sure you are taking classes that meet or exceed college admission requirements, including algebra II or advanced math, and English.
- Aim for top grades - they are especially important during your junior and senior years.
- Register and take the PSAT, a practice exam for the SAT.
- Focus your energy on developing your academic record, but understand that colleges will look at what you do outside of the classroom as well.
- If taking advanced placement (AP) courses, register to take the AP exams in the spring. Scoring well on the tests will give you college credit for those courses!
- Start to think about taking college entrance exams, such as the SAT or ACT. Learn more about the ACT by visiting www.actstudent.org. You can register for the SAT at www.collegeboard.com. Your school counselor can provide more details as well.
- Prepare for the SAT, SAT II, or ACT by reviewing test preparation books with sample questions. Your guidance office may have free preparation booklets.
- Attend "Destination College," the free statewide college planning event held every March for high school juniors and their parents. Visit www.destinationcollege.org for details.
- Get to know the colleges you are considering. Think about how each college fits your strengths and interests, your values and expectations.

Families:

- Visit one or more of USNH's colleges/universities or a nearby campus. Contact the campus admissions office to schedule a tour and information session.
- Attend college information programs and meet with college/university representatives when they visit your student's high school.
- Attend "Destination College" with your student. This is a free statewide college planning event held every March for juniors and their parents. Visit www.destinationcollege.org for details.
- Call the Center for College Planning at NHHEAF (1-800-525-2577, ext. 119) for help with any questions relating to the college process. Or make a FREE appointment with a college counselor.

WANNA MAKE A MILLION?

DATA: BASED ON STATE 2006 CENSUS DATA

*A great piece of paper called a **degree** is proof you have finished college. There are many kinds: At a community college, you can earn an **associate of arts degree (A.A.)**. At a four-year college, you can earn a **bachelor's degree**—say, a bachelor of science degree (B.S.) or of arts (B.A.). ("Arts" doesn't necessarily mean you've studied art. Colleges call subjects like French and history the "arts.") After graduating from a four-year college, you can study at a graduate school and earn a **master's degree (M.A., M.S., etc.)** or a higher degree, the **Ph.D.** Or you can study to be an **M.D. (Doctor of Medicine)** or a **J.D. (which makes you a lawyer)**.
